

# Synoptix

## SYNOPTIX CUTS REPORTING TIME DOWN TO JUST A FEW CLICKS FOR ANOTHER VALUED VISUAL ERP USER

For almost 50 years the printing industry has been placing its trust in Kocher + Beck's quality products. As a globally recognized market leader in the field of rotary-die cutting technology, Kocher + Beck is also the preferred systems supplier in other areas related to the production of high-quality printed products. Tight tolerance magnetic cylinders, high-precision hot stamping cylinders, and fully servo driven state of the art butt splicers are just a few of Kocher + Beck's first class product range available to the printing industry

A Visual ERP customer since 2011, Kocher+Beck has been utilizing CompuSoft Development's Synoptix report writer for far longer. In 2006, after implementing another ERP system, they quickly discovered the provided standard reports were woefully inadequate. After discussing their needs with their consultants, Synoptix was recommended as an easy to use, yet powerful, reporting solution.

### PROFILE:

- Supplier of High End Printing Production Products
- Production Sites in Germany, the UK, the US, and Russia
- Established in 1965
- Globally recognized market leader in rotary-die cutting technology

### CHALLENGES:

- Previous ERP System reports woefully inadequate
- Over 10 hours per month trying to get the reports they need
- Needed to see beyond the numbers in order to understand context
- Needed existing reports to migrate to new Visual ERP implementation

### SOLUTION:

- Synoptix

### RESULTS:

- Reporting much easier to do
- Running reports a simple matter of entering the date and running it
- Migration of existing reports to Visual ERP very easy
- Greater team efficiency
- Drill down all the way to source for greater clarity and context
- Synoptix software and support ranked as a 10

“Reporting is a lot **easier** now that we have **Synoptix**. We probably spent **10 hours** for our reporting alone. **Now** all I have to do is **change** the date and run the report.”

Daniel Grammatikos  
VP of Finance  
Kocher+Beck

---

Daniel Grammatikos, VP of Finance, found Synoptix to be just the tool they needed. They quickly began utilizing it for both Financial and Operational reporting. He says, “Reporting is a lot easier now that we have Synoptix. We probably spent 10 hours for our reporting alone. Now all I have to do is change the date and run the report.”

Their reports include a Balance Sheet, three different sets of Income Statements, multiple AR Reports, Customer Account Statements, Daily Sales Reports, and many more. Daniel says, “We are more efficient as a team. I can run multiple reports for analysis and drill down to the details, which makes it very effective for us.”

Five years later, when they upgraded their system to Infor’s Visual ERP, they were thrilled to discover they could continue using Synoptix. They found the migration to be a simple matter of importing the reports over to the new database with very few modifications.

When asked about his experience with both Synoptix and the support at CompuSoft Development, Grammatikos replied it would “definitely rank a 10” and says he welcomes the opportunity to act as a reference for Visual users looking for a reporting solution.
